Sound-art installation

PROJECTS

SECOND PORTFOLIO - work in progress

https://github.com/712derek/712_derek

After having finished my first portfolio website, it was time for me to restart and put to use the skills i learned to create a website in my own style.

Skills: React, Hooks, Styled Components, JS, Netlify

REACT NATIVE - The Practical Guide - udemy course - work in progress

https://github.com/712derek/rn-guess-a-number

"Use React Native and your React knowledge to build native iOS and Android Apps - incl. Push Notifications, Hooks, Redux" As an extracurricular course, I started this React-Native course to get a basic understanding of this library.

React-Native, Hooks, Redux

FIRST PORTFOLIO

www.712derek.com

As part of the Intec front-end developer course, I built a portfolio website. The assignment was to build a functional and aesthetic website using the React library. During this process I learned to build a website with Components. I kept the use of external Components to a minimum to be able to push myself to learn as much coding as possible. Building this website also gave me an introduction into using react hooks. Instead of using the conventional styling in css files I used styled components to style my portfolio.

Skills: React, Hooks, Styled Components, JS, Netlify

AMAZON CLONE

https://github.com/712derek/amazon_clone

As my first introduction to React I followed an instruction video to build an amazon clone.

Skills: React, CSS, JS, Firebase

REACT STYLED COMPONENTS - udemy course

https://github.com/712derek/amazon_clone

"Ditch CSS stylesheets! Learn CSS in JS to quickly and cleanly style React components with the styled components library." To get a better understanding of modern React styling, I followed an extracurricular course on udemy. Certificate obtained.

Skills: React, Styled Components
